DETAILED ACTION

Status of the Application

Claims 1-37 are pending in the application.

Amendment to the claims in Paper No. 3, filed 04/03/2000 and receipt of a sequence listing in paper and computer readable forms in Paper No. 5, filed 05/30/01 are acknowledged.

Lack of Unity

1. Lack of unity is required under 35 U.S.C. 121 and 372. This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

Group I, claims 1-17, drawn to methods of microbial production of amino acids of the aspartate and/or glutamate families.

Group II, claims 18-31, drawn to a pyruvate carboxylase gene, and a vector and transformed cells containing a pyruvate carboxylase gene.

Group III, claims 32-37, drawn to uses of a pyruvate carboxylase gene.

2. The technical feature linking Groups I-III appears to be that they all relate to a pyruvate carboxylase gene.

3. The inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical feature for the following reasons: pyruvate carboxylase genes isolated from *Coryneform glutamicum* are known in the prior art (see Peters-Wendisch et al., Microbiology 144:915-27, International Search Report). Peters-Wendisch et al. discloses a pyruvate

carboxylase gene from *Coryneform glutamicum* and thus, the three groups share no special technical feature as defined by PCT Rule 13.2.

4. These inventions are distinct for the reasons given above, have acquired a separate status in the art, and require divergent literature (patent and non-patent) and/or sequence searches.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Certain papers related to this application may be submitted to Art Unit 1652 by facsimile transmission. The FAX number is (703) 308-4242. The faxing of such papers must conform with the notices published in the Official Gazette, 1156 OG 61 (November 16, 1993) and 1157 OG 94 (December 28, 1993) (see 37 CFR 1.6(d)). NOTE: If Applicant submits a paper by FAX, the original copy should be retained by Applicant or Applicant's representative. NO DUPLICATE COPIES SHOULD BE SUBMITTED, so as to avoid the processing of duplicate papers in the Office.
